<u>**Nest Fresh Eggs Producer Outsources IT Services to Cebic Technologies Inc.**</u>

DENVER – Colorado Natural Eggs, distributor of the Nest Fresh Eggs brand, has selected Cebic Technologies Inc. to provide computer security, monitoring and service to its corporate headquarters in Denver.

"We don't have an in-house IT person, so outsourcing this function makes great business sense," said Cyd Szymanski, owner of Nest Fresh. "It allows me to focus on egg sales instead of our computer networks. It's a better use of my time."

Cebic's Remote Intelligence® Center is a state-of-the-art computer support center that offers complete systems maintenance support, including virus management, software/hardware maintenance, network management, security monitoring and real-time remote IT engineering support on equipment.
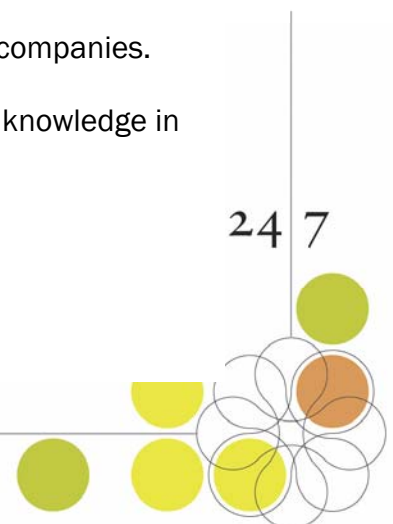

Cebic Technologies provides IT support remotely, offering small businesses the expertise and immediate response previously available only to Fortune 500 companies. Cebic gives customers access to senior-level engineers with a wide scope of knowledge in computer hardware, networking and software.

safeguarding electronic business assets™

NEST FRESH RELEASE .. continued

Remote Intelligence, starting at $30 per computer per month, serves businesses that rely on computers to deliver products and services to customers, including CPAs, financial services companies, brokers, law firms, business consultants, graphic design firms and medical clinics, as well as other professional services.

About Cebic Technologies Inc.

Cebic Technologies Inc. provides affordable, real-time IT management for small businesses, allowing executives to concentrate on their businesses rather than dealing with IT issues that require a high level of expertise in technology. Cebic safeguards electronic business assets by establishing and maintaining healthy computer networks. We eliminate viruses, security breaches, computer system overload and other technical issues to proactively maximize network performance and productivity for your company.
